

Retail Pharmacy Classification

October 20, 2025

Scoring methodology for initial seeding using NPPES and NCPDP data

Part One: Scoring Methodology

Pharmacies submitted in the 2025 PBM submission were mapped to the NPI Registry to retrieve primary taxonomy. Pharmacies were then mapped to the NCPDP data to retrieve the Provider Type Codes from that dataset.

Pharmacies were then assigned a “Retail Score” of 0-5, zero being the least likely to be a community/retail pharmacy to 5 being the most likely. The following rules were applied:

Using NPI Registry NUCC taxonomy codes, if the primary taxonomy is **3336C0003X: Community/Retail Pharmacy**, 2 points were awarded. If the primary taxonomy is **333600000X: Pharmacy**, or if the primary taxonomy is **183500000X: Pharmacist**, 1 point is awarded. Any other primary taxonomy is awarded zero points.

Using NCPDP Provider Type Codes (PTC), the type code of 1 denotes Community/Retail Pharmacy. Having a **primary PTC** of 1 is awarded 3 points, a **secondary PTC** of 1 is awarded 2 points, a **tertiary PTC** of 1 is awarded 1 point, and zero points are awarded if Community/Retail Pharmacy appears in none of the Provider Type Code slots.

Examples:

- Primary Taxonomy of 3336C0003X (+2) and Primary PTC of 1 (+3) = 5 points
- Primary Taxonomy of 333600000X for generic Pharmacy (+1) and Primary PTC of 1 (+3) = 4 points
- Primary Taxonomy of 3336C0004X for Compounding Pharmacy (+0) and Secondary PTC of 1 (+2) = 2 points

Upon examining the resulting scores and looking at examples, a score of 4 or 5 points using this scale was determined to be a strong indicator of a Community/Retail Pharmacy in the spirit of the Arkansas PBM network adequacy rule. This classification cannot be 100% correct, but we must rely on the PTNP process to correct erroneous inclusion or exclusion.

The pitfall of this scoring method is that pharmacies having no data or incomplete data in either the NPI Registry or the NCPDP will be left off of the list. Some examples exist on the list of excluded pharmacies that almost certainly should be classified as Community/Retail. However, the classification task was only to provide an initial data-driven seeding as a “head start” for issuer participation. Further judgment or research falls outside the scope of this technical analysis.

Part Two: Excluded Pharmacies

Below is the list of pharmacies receiving a 3 or below using the above scoring methodology. Where available, we have also listed the NPI for a pharmacy record with the same company name and address that did score a 4 or 5. Note that many of the pharmacies that might appear to have been erroneously excluded in fact have an alternate NPI that was included.
